How to Download a Zip File

1. Click on the word **DOWNLOAD** on your receipt confirming your order.
2. Scroll to the bottom of the Download Instructions.
3. Click on **Download Zip File** (do not open the individual documents).
4. Select **Save** and save the file in a folder on your computer where you will be able to access it in the future.
5. You have a limited number of downloads and each click counts as a download.

You have two options for downloading. You can either download the Zip file and extract the individual files on your computer, or you can download each individual file below.

This item is available for download in a Zip file. A Zip file is a "compressed" format file. Multiple files have been compressed in size and stored in this Zip file. Storing files in the Zip format provides two advantages for you: (1) Several files (e.g., all of the files associated with this order) can be downloaded as one file, and (2) the files stored in a Zip file are compressed, making the Zip file smaller than the size of the uncompressed files, resulting in a faster download.
